Rediscover Your Network's Potential

Transform Your Enterprise Connectivity with ReadyLinks

ARCTIQ

≋ Modern Infrastructure

The Dilemma of Legacy Infrastructure

CIOs today face considerable challenges in evolving their network infrastructure. Legacy copper cabling systems, while once the backbone of enterprise connectivity, now stifle the growth and adaptability of modern organizations due to:

Expensive Upgrading
Traditional re-cabling involves significant expenditure and disruptive renovations.

Limited Bandwidth
Copper cables cannot match the bandwidth capabilities of new-age technologies, diminishing data transmission efficiency.
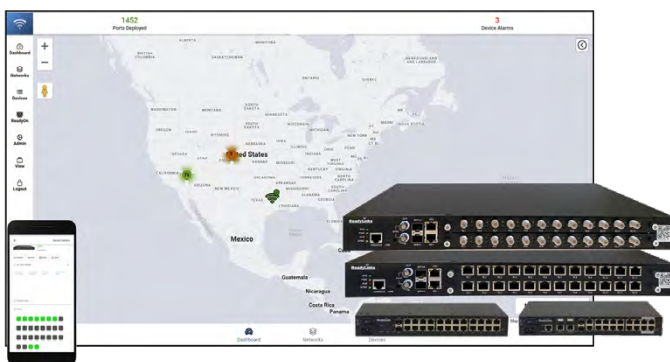

Compatibility Concerns
Ever-evolving technology makes it difficult for old cabling to support new networking equipment without substantial additional investments.

Protracted Installation Times
Replacement of existing cables can take an inordinate amount of time—sometimes years.

Distance Limitations
With copper cables, the longer the distance, the poorer the signal quality, impeding high-speed network performance.

Questionable Long-Term Viability
The fast-paced advancement in technology necessitates an infrastructure that can withstand and leverage future developments.

Revolutionizing Connectivity with ReadyLinks

Enter ReadyLinks—a robust, future-proof networking platform that propels your organization's network infrastructure into the modern era without the hassles of traditional re-cabling. ReadyLinks isn't merely an upgrade—it's a paradigm shift.

Intuitive Platform
Get an unmatched management experience that streamlines deployment and doesn't require extra training.

Zero Touch Provisioning & Client Insights
Automate device setup and harness valuable data for optimized network operations.

Location Inventory
Maintain an organized inventory and have complete location awareness within your network.

Cutting-Edge Solutions

ReadyLinks Switches
Minimal latency and speeds up to 2 Gbps ensure you deal with no compromises.

High-Speed Ethernet Over Existing Cables
Power over Ethernet and lightning-fast connectivity make ReadyLinks the smart choice.

Management & Monitoring Software
Comprehensive applications to control and capitalize on your network infrastructure.

API for Infrastructure as Code
Stay ahead with actionable real-time insights and cloud-managed networking.

Across All Industries

Whether hospitality, education, healthcare, retail, government, professional services, or the high demands of casino operations, ReadyLinks is the go-to solution for:

- Software-defined networking
- Core distribution and access
- IP surveillance
- High-speed gaming
- IPTV and Wi-Fi

Case Study

National Hospitality Organization

With ReadyLinks, a leading casino rolled out its high-speed network across 55+ properties in just 6 months—a process initially projected to take 3 years.

The Result

Realized a staggering $40 million in savings and a sleek deployment of digital signage and enterprise Wi-Fi.

ReadyLinks

The Unified Platform

With a vast portfolio of advanced networking products, ReadyLinks satisfies every connectivity demand out-of-the-box:

Easy deployment

Simplified management

Leverage of existing infrastructure

Meeting needs for any location, topology, and connectivity requirement

Powering Connectivity, Empowering Enterprises

Make the switch to simplicity, capability, and cost-efficiency. ReadyLinks is revolutionizing enterprise connectivity—one connection at a time.
