

# ARCTIQ

## Arctiq + Splunk

### Unlock the Full Power of Your Data

splunk>  
a CISCO company

## Elite Expertise. Proven Delivery. Measurable Impact.

As a Splunk Elite Partner, Arctiq delivers unmatched technical depth, strategic guidance, and proven success. Our certified consultants help organizations accelerate time to value, strengthen their security posture, and uncover meaningful insights across data-rich environments.

**We don't just deploy Splunk—we help you transform with it.**

## The Arctiq Difference

### Elite Partner Status

Highest Splunk partnership tier. We offer the most competitive pricing and access to top-tier technical talent.

### 250+ Successful Deployments

Over a decade of experience delivering complex, secure, and scalable Splunk solutions across industries.

### Splunk-Approved Services Provider

As a Professional Services Subcontractor, Arctiq is trusted by Splunk to deliver projects under their brand. We connect your technology goals with business outcomes—ensuring every deployment is scalable, efficient, and future-ready.

### Multi-Platform Expertise

We support the full Splunk ecosystem:

- Enterprise Security (ES)
- IT Service Intelligence (ITSI)
- Splunk Cloud Migrations
- Splunk Observability

### Complex Environments Mastered

Deployed in:

- Air-gapped & OT networks
- All levels of government
- NERC CIP-compliant utility environments
- Multi-cloud & multi-terabyte architectures

### Accelerated Time to Value

Our proven frameworks streamline implementation and maximize your ROI. We move fast—without cutting corners.

### Certified & Security-Cleared

- Certified in Splunk & across ISC2, SANS, and other top industry bodies
- Canadian Secret (Level II) Cleared

### Enhance Your Security Posture

Our experts go beyond basic implementation—delivering security use case workshops, MITRE ATT&CK coverage, privacy compliance apps, and custom dashboards tailored to your business needs.

## Use Cases: From Visibility to Value

How Arctiq helps organizations turn Splunk data into actionable insights.

### Security Operations Center (SOC) Enablement

Deploy Splunk ES to correlate logs, detect threats, and respond faster using MITRE ATT&CK-aligned analytics and pre-built detections.

### Cloud Migration & Monitoring

Seamlessly migrate Splunk workloads to the cloud while gaining visibility into performance, security, and user behavior across AWS, GCP, and Azure.

### Insider Threat & Privacy Monitoring

Deploy EPPAM—Arctiq’s Employee Privacy Monitoring App—to detect improper access to sensitive records (e.g., patient health data), aligning with compliance mandates.

### Infrastructure Health & IT Operations Monitoring

Visualize and alert on infrastructure performance with ITSI. Reduce mean time to detect and resolve incidents across hybrid environments.

### Operational Technology (OT) Monitoring

Gain situational awareness in industrial environments and meet NERC CIP compliance using Splunk to monitor network traffic, access logs, and anomaly detection.

### Executive Dashboards & Business Analytics

Deliver custom dashboards for leadership teams to visualize KPIs, track business trends, and make data-driven decisions in real time.

## Driving Efficiency & Security for a Leading Telecom Provider

### The Challenge:

A leading telecom provider sought to optimize its Splunk environment to support business growth, improve data ingestion, and secure long-term pricing stability. With increasing data volumes and evolving operational needs, the client required a strategic approach to ensure both cost efficiency and scalability.

### Arctiq’s Solution:

- Ensured Splunk deployment was optimized to client’s needs
- Secured long-term pricing stability
- Enhanced observability for multiple business units
- Leveraged expertise to assist with training requirements to drive faster adoption
- Provided ongoing strategic guidance

### The Impact:

The client now benefits from a scalable and cost-efficient Splunk deployment with a predictable cost model. Arctiq’s deep expertise ensures the client receives the most out of their Splunk deployment, driving innovation and operational excellence.

## Beyond Splunk: Arctiq’s Cisco Ecosystem Expertise

As a Cisco Gold Partner with multiple advanced specializations—including Full-Stack Observability, Security, IoT, and Cloud-native Network & Data Center Modernization—Arctiq brings full-spectrum expertise across modern infrastructure and operations.

## Let’s Get Started

- ▶ Whether you’re scaling your Splunk environment, moving to the cloud, or developing new use cases—Arctiq is your partner for what’s next.
