ARCTIQ

GitHub

Unleash Developer Productivity with GitHub Copilot

⌃ Platform Engineering

Unlock the Power of AI-Assisted Development with Arctiq Services

As a leading GitHub Premier Service Delivery Partner, Arctiq offers unparalleled expertise in empowering organizations to leverage the full potential of GitHub. We specialize in seamless integrations and go beyond deployment with a comprehensive suite of services designed to maximize the value of GitHub Copilot for your development teams.

Overcome Adoption Challenges

While GitHub Copilot offers tremendous benefits, organizations face hurdles when integrating it into their development practices, including:

Needs Assessment & Readiness Evaluation
Understanding your current environment and team preparedness for smooth adoption.

Change Management & User Acceptance
Facilitating a smooth transition and fostering positive attitudes towards Copilot among developers.

Skill Development & Training
Equipping your teams with the knowledge and skills to use Copilot effectively.

Data-Driven Optimization & Continuous Improvement
Measuring Copilot's impact and continuously refining its integration for maximum value.

Why GitHub Copilot?

GitHub Copilot is an innovative AI-powered tool that suggests code completions and functions as you type. This cutting-edge technology can significantly boost developer productivity by:

- Reducing boilerplate code and repetitive tasks
- Providing context-aware suggestions that streamline coding workflows
- Helping developers explore new coding possibilities and enhance their skills

GitHub Copilot

Arctiq Adoption Services for GitHub Copilot

Arctiq's comprehensive services empower you to overcome adoption challenges and maximize the value of GitHub Copilot within your organization.

Tailored Adoption Strategy

We conduct a thorough assessment of your needs, including a "developer voice" initiative, to create a customized adoption plan aligned with your specific environment and developer preferences.

Skill Development & Training

We provide interactive workshops covering core Copilot functionalities, best practices for code maintenance, understanding suggestion types, and effective prompt crafting.

Continuous Learning Portal

We establish a dedicated resource portal offering ongoing educational resources, updates, and tutorials for developers to master Copilot.

Change Management & Peer Learning

We facilitate peer learning sessions and knowledge-sharing initiatives to foster a collaborative environment and empower developers to solve problems together.

Data-Driven Insights & Continuous Improvement

We help you establish key performance indicators (KPIs), implement data gathering tools, and provide actionable insights to continuously refine your Copilot integration and maximize its long-term value.

The Arctiq Advantage

Expert Coaching on Git-Based Tooling and Processes

Arctiq helps teams adopt Git-based tools and processes and provides guidance on shifting to a culture-centric approach to coding.

Quality and Speed

Our flexible team encourages speaking a common language and writing higher-quality code faster. We also facilitate a more collaborative and open team dynamic.

Enhanced Code Sharing and Collaboration

Arctiq coaches developers and SysAdmins to embrace an open and social coding environment and promotes the sharing and re-use of approved code securely within enterprise settings.

Innovation and Growth

We drive innovation and growth for applications and the business as a whole and utilize GitHub's social platform to enhance internal code sharing opportunities.

Certified Expertise

Arctiq's status as a Certified GitHub Partner signifies adherence to GitHub's high standards. We have proven success in delivering GitHub solutions and services, ensuring reliable and effective support.
