

Arctiq's GitLab Migration Services

Achieve faster innovation, stronger security, and streamlined workflows through expert-led GitLab migrations tailored to your business needs.

Platform Engineering

As organizations face the need to modernize their IT infrastructure and adopt agile methodologies, many struggle with legacy systems and disparate CI/CD tools that hinder efficiency and scalability. This challenge is amplified by the growing demands for security and strict compliance, especially in highly regulated industries like finance, healthcare, and government, where even the smallest gaps can have major consequences.

Arctiq, a GitLab Select Partner, offers specialized GitLab Migration Services designed to overcome these challenges and accelerate your DevOps transformation. Our approach begins with a comprehensive assessment of your existing environment, followed by the creation of a customized migration plan. We ensure that the transition from legacy systems or multi-tool setups to GitLab's unified DevSecOps platform is seamless, secure, and tailored to your unique requirements.

Our services include:

Migration Assessment:

A thorough analysis of your current systems to identify dependencies, performance gaps, and security needs.

Architecture Design:

Planning and designing a scalable, secure architecture for your GitLab environment that aligns with your business goals.

Full Migration Execution:

Expert-led migration from your current CI/CD tools or legacy platforms to GitLab, ensuring minimal disruption and maximum security.

Post-Migration Support:

Comprehensive training and ongoing support to ensure successful adoption and optimization of GitLab across your teams.

The Arctiq Advantage

- **Enhanced Security and Compliance:** Arctiq prioritizes security and compliance throughout the migration process, ensuring your operations meet industry standards.
- **Increased Productivity:** GitLab's integrated DevSecOps platform streamlines development workflows, enhancing efficiency across teams.
- **Cost-Effective Transformation:** We help you consolidate tools and optimize processes, reducing costs and improving your DevOps maturity.
