

Migrate from VMware to OpenShift Virtualization

Platform Engineering

Controlling Virtualization Costs

Recent changes in VMware's licensing models and pricing strategies have led to considerable cost increases for many organizations. To stay competitive and future-proof your technology landscape, a strategic transformation is essential.

As a trusted North American Red Hat partner, Arctiq has the expertise to facilitate your organization's migration journey from VMware to Red Hat OpenShift Virtualization. Our tailored approach ensures that your transition is not merely a migration but an architectural transformation, enabling you to leverage cutting-edge technologies while optimizing costs.

Benefits of Migrating to OpenShift Virtualization

Streamlined App Development

Integrating VMs into the OpenShift application platform provides a consistent environment for faster application development and deployment, accelerating time to market.

Operational Efficiency

By consolidating VMs and containers under a single pane of management, OpenShift Virtualization reduces operational overhead, streamlining workflows and aligning IT operations and development teams. This combined approach maximizes hardware utilization, ultimately resulting in cost savings.

Cost Savings

OpenShift Virtualization provides cost savings through efficient resource utilization, flexible pricing models, and streamlined infrastructure management. Leveraging Red Hat Enterprise Linux (RHEL) unlocks additional value with OpenShift Virtualization, as RHEL subscriptions are included at no extra cost when managed through OCP-V. This translates to significant savings for organizations with substantial RHEL deployments.

Modernization Strategy

OpenShift Virtualization offers a unified platform for managing VMs and containers, simplifying infrastructure management and reducing complexity.

Interoperability and Open Standards

OpenShift Virtualization operates on open standards, ensuring compatibility with a wide range of infrastructures, both on-premises and in the cloud, offering flexibility to fit diverse application and IT strategies.

Benefits of Migrating to OpenShift Virtualization

Comprehensive Assessment

Our experts conduct a thorough evaluation of your current VMware environment, including your existing toolsets, desired outcomes, and craft a customized migration plan that leverages your existing investments to optimize your overall enterprise experience.

Seamless Execution

Our team leverages proven tools and methodologies, such as the Migration Toolkit for Virtualization (MTV), ensuring a smooth transition.

Post-Migration Optimization

Our engagement does not end with migration. We help you maximize the benefits of OpenShift Virtualization, ensuring optimal resource use and performance.

The Arctiq Advantage

Certified Experts

We employ accredited Technical and Sales professionals, including Red Hat certified Delivery Consultants in Canada.

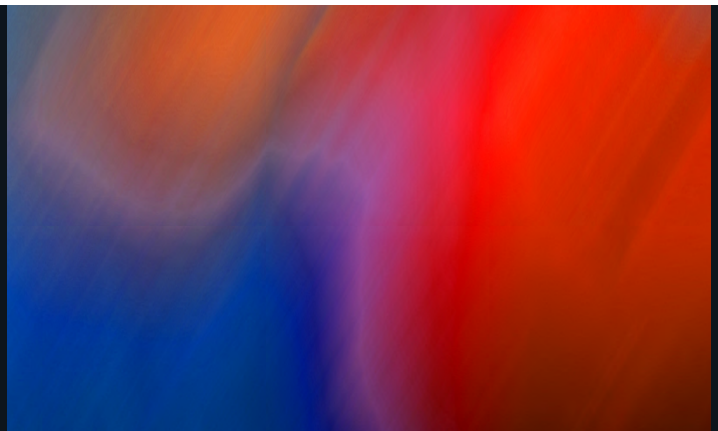

ArctiqLabs

We offer workshops and lab-based training that are designed to deliver exceptional value by equipping customers with enhanced skills and capabilities. Our focus is on enabling clients to be self-sufficient which accelerates software/tooling/platform adoption ensuring long-term success.

Community Engagement

We love to share insights through technical blogs and participate actively in the tech community (speaking spots at Red Hat User Groups and other events).

▶ [Contact us to learn how your organization can accelerate the adoption of Red Hat tools and solutions by leveraging the Arctiq Advantage.](#)

Agile Delivery

Our flexible team delivery approach ensures project work is delivered by consultants experienced in real-world scenarios and can be rapidly augmented with additional team members to meet aggressive timelines when needed.

Bilingual Advantage

We have physical offices across US and Canada including Quebec, with English and French-speaking sales, technical and PMO teams.
