

Splunk Professional Services

Accelerate time to value and maximize your investment with Splunk expertise

Why use professional services?

Expertise You Can Trust

Our team holds specialized certifications and proven expertise in architecture, implementation, migrations, and use case development. We deliver projects with precision and reliability.

Real-World Deployment Success

With over 250 successful Splunk implementations, our consultants have extensive hands-on experience in troubleshooting, configuring, and deploying solutions tailored to your needs.

Accelerated Time to Value

We provide tested implementation plans that help your organization get up and running quickly, ensuring a smooth transition and faster return on your investment.

Comprehensive Security Solutions

Our security experts go beyond installation, offering use case development workshops, MITRE coverage, and identifying Splunk-driven opportunities to strengthen your security posture.

Maximizing Value from Your Investment

Discover new capabilities within your existing log sources, unlocking multiple use cases that deliver additional value and enhance your operational performance.

Why Partner with Arctiq?

Maximize Your Technology Investment

Arctiq's deep expertise ensures you get the most out of your technology, driving innovation and operational excellence. We're your trusted partner in delivering cutting-edge solutions tailored to your business needs.

Comprehensive Solutions Beyond Professional Services

As an elite-level reseller and managed Splunk partner, we offer not just professional services but also the industry's best tools for enhanced data insights and security management.

Pioneering Innovation in Privacy Monitoring

Arctiq developed the Employee Privacy Monitoring App (EPPAM), trusted by multiple healthcare organizations to ensure compliance and safeguard sensitive data.

Our Approach

Foundation

We build cybersecurity solutions that create a sense of calm, ensure compliance, and promote business continuity.

Operations

Our integrated SIEM and SOAR solutions streamline threat detection and response, optimizing security operations for seamless protection.
