# Managed Extended Detection & Response (MXDR) Service

powered by Google Chronicle Security Operations

## Helping Organizations Improve Their Security Posture and Fight Advanced Cyber Threats

Modern organizations face an ever-growing array of evolving security threats with significant consequences for finances, trust, and reputation. The key challenge is the ability to effectively monitor, identify, respond to, and remediate multiple simultaneous security threats.

Our Managed Extended Detection and Response (MXDR) service delivers expert, 24/7, year-round vigilance, using Google Chronicle SIEM and SOAR to detect, investigate and respond to threats. This fully managed service automates security detection and response to safeguard IT infrastructure, systems, data, and more.

## Security Operations Centers

Arctiq operates three Security Operations Centers strategically located across North America, ensuring comprehensive coverage and timely threat response. We offer a robust suite of services designed to fortify your cybersecurity defenses, including:

#### **Advanced Threat Intelligence**

Leverage Google Cloud and Mandiant threat intelligence for world class intelligence derived from the front lines.

#### **Threat Hunting**

Arctiq hunters proactively seek out potential threats within your environment, going beyond traditional monitoring to actively identify and neutralize risks.

#### **Cloud-native Security Analytics**

Ingest and analyze data at cloud-scale. Our analytics capabilities provide in-depth insights into security incidents, offering curated detections for advanced threats

#### **Automated Response:**

With Chronicle SOAR and our dedicated team, we can take swift action to respond to security incidents, ensuring timely resolution.

#### **Monitoring and Alerting**

With round-the-clock 'eyes on glass' coverage, we swiftly identify critical threats in near real-time, converting alerts into actionable intelligence.

## Key Benefits

- Comprehensive solutions aligned with core security controls to meet stringent compliance and cyber insurance requirements
- Fast response times for security events with the ability to triage incidents
- · Use of machine learning to increase efficacy of detection
- Reviews with security experts to analyze metrics, incidents, recommended security enhancements to existing toolset, and security best practices
- Access to technology experts in adjacent areas such as storage, infrastructure, data center, Microsoft platforms, and more
- Enhanced visibility into the security of users and systems including analysis of user and entity behavior analytics

## Core MXDR Services

#### Cloud & Identity Security

Safeguard cloud environments and identity management systems to ensure that your digital assets remain secure.

#### SIEM (Security Information and Event Management) Empower organizations to gain

Empower organizations to gain insights into security events, anomalies, and threats, enabling proactive threat detection and response.

#### Incident Response

Ensure your organization has a dedicated team ready to respond swiftly and effectively to security incidents when they occur.

#### Vulnerability Management

Identify and mitigate weaknesses in your systems, reducing the attack surface and enhancing overall security.

#### Patch Management

Keep your systems and software up-to-date with the latest security patches, reducing vulnerabilities and strengthening your defenses.

## Proactive Security Consulting

We take a proactive stance in offering consulting services led by our team of seasoned security experts. Our approach involves in-depth analysis of security metrics, the formulation of targeted security enhancement recommendations, and the sharing of knowledge gained from numerous successful projects. We believe in continuous improvement and maintain open collaboration for transparency with our clients as fundamental principles of our consulting practice.

## Customer Experience

At the core of our services is a commitment to delivering an exceptional customer experience. We believe in providing a white-glove experience accompanied by comprehensive metrics and reporting, including robust tools that offer deep insights into your security landscape. Our onboarding process is swift and hassle-free, with a dedicated success team and project management support to ensure a smooth transition. We also offer executive-level reporting and metrics for clear, concise insights into your environment's security activity.

### Contact Arctiq Today

Transform your security with Arctiq's MXDR and experience unrivaled protection by a highly certified team.

Partner with Arctiq to elevate your defense with 24/7 vigilance, automated detection, and proven expertise.
