

Microsoft Technologies

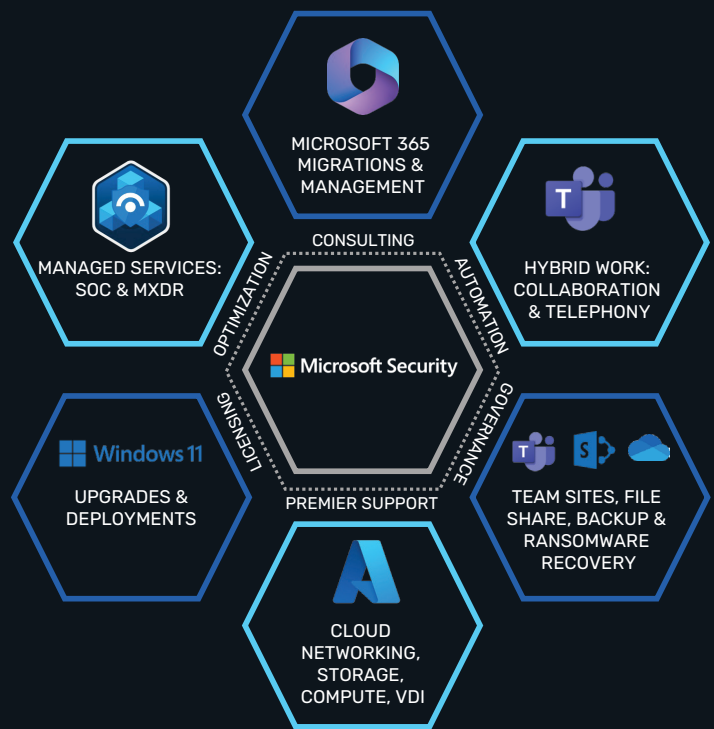

≡ Modern Infrastructure

A comprehensive range of offerings to support your

Microsoft Platforms

Whether you are looking for ways to enhance your business productivity, map your path to a cloud platform, enhance your security posture, or support your hybrid workforce, Arctiq has the industry and technology expertise and resources to get the solution you need and the results you're after.

Arctiq, a Microsoft National Solution Provider, Cloud Solution Provider, and Managed Security Services Provider, provides a comprehensive range of offerings to support your Microsoft platforms, including strategic planning sessions, workshops, assessments, proof-of-concepts, deployments, and support services. We create and implement solutions that focus on helping our customers realize the greatest value from their existing Microsoft software investment. In addition, Arctiq helps our clients take advantage of Microsoft incentives and funding programs available to support the deployment of new technologies.
